

BOOBESH PRASATH M

Fresher | ETL Testing | Frontend Developer | SQL

+91 9944425150 | prasanth909214@gmail.com | Chennai, Tamil Nadu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

B.E. Computer Science graduate with hands-on knowledge in ETL Testing and Advanced knowledge of SQL, Data validation, source-to-target mapping, data modeling, ETL/ELT concepts and Data Quality Validation, HTML, CSS, JavaScript, Java, and Python basics. Familiar with AWS Cloud, Git, Docker, and CI/CD practices. Strong analytical, problem-solving, and communication skills with the ability to work in Agile environments and quickly adapt to new technologies.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript, Responsive Web Design

ETL Testing & QA: ETL Testing, Data Quality Validation, Data Modeling, Data Warehousing, Source-to-Target Mapping, Functional Testing, Database Testing, Defect Tracking

Database & Cloud: SQL, Relational Database Concepts, Data Analysis, AWS EC2,

Programming: Java, Python (Basic), OOP Concepts

DevOps & Tools: Git, GitHub, GitHub Actions, Docker, Linux CLI

Tools: JIRA, MS Excel (VLOOKUP, PIVOT, CHAT), Figma, Miro

EDUCATION

B.E – Computer Science and Engineering	2021 – 2025
VSB College of Engineering Technical Campus Anna University	GPA: 8.2 / 10
HSC – Computer Science and Maths	2020 – 2021
Swamy Vivekanadha Matric Hr Sec School State Board	80%

INTERNSHIP EXPERIENCE

Frontend Developer Techvolt Software Private Ltd	June 2024 – Aug 2024
- Assisted in developing responsive and user-friendly web pages using HTML5 and CSS3, ensuring compatibility across different devices and browsers. - Supported the creation of UI prototypes, wireframes, and mockups using Figma and Miro, contributing to design discussions and user interface improvements. - Participated in frontend development tasks, collaborated with team members during code reviews, and utilized Git for version control and project management activities.	

PROJECTS

Sales Data ETL Validation Project
- Developed an ETL Testing using MySQL to validate data migration from source systems to target database. - Created source and target table and implemented ETL transformation logic using SQL queries. - Performed Source-to-Target validation to ensure correct data mapping and identify data mismatches. - Executed Row count Validation, Null Validation, and Duplicate Validation to maintain data quality and completeness. - Conducted Transformation Testing by validating business rules, calculated fields, and transformed data. - Created and maintained ETL test cases, defect reports, and test summary reports for effective test documentation. - Utilized SQL, MySQL, Microsoft Excel, and GitHub to perform data validation, data tracking and documentation
CI/CD Pipeline Demo Node.js, Docker, GitHub Actions, AWS EC2
- Automated the build, testing, and deployment process of a Node.js application using GitHub Actions. - Containerized the application using Docker to ensure consistent deployment across environments. - Deployed the application to AWS EC2 using SSH and shell scripting, gaining hands-on experience in CI/CD and DevOps practices.

CERTIFICATIONS

- Full Stack Web Development – Internship Program
- Java Programming & C Programming – Great Learning
- AWS Cloud Foundations – AWS Academy
